Product Description

SBW8500 highlights

- Wrap large, high-moisture bales in individually sealed packages
- Smart technology and a rugged frame
- Convenient operation

Maximize your efficiency with a durable loading arm that gently positions bales onto the wrapping table.

Help protect your bales from damage with ground bracing that stabilizes the load, while the bale discharge system gently cradles and releases it at a low drop point.

Experience seamless automation and real-time field statistics with the in-cab electronic control system, featuring an intuitive color touchscreen for effortless wrapping.

Maximize your efficiency with a durable loading arm that gently positions bales onto the wrapping table.

Boost your productivity with convenient storage for three rolls of plastic film on the machine, allowing you to stay in the field while wrapping.
