Product Description

604R Premium baler highlights

- Strong, fast and smart features
- Premium haymaking, simple operation
- Make bales you can be proud of

The camless pickup maximizes productivity while reducing maintenance with 30 fewer wear parts compared to a cammed pickup.

The netwrap system on all 604 R-series balers lets operators control net tension for optimal coverage.

Bale density can be controlled in cab from the Atlas Pro™ control system monitor allowing operators to decide how dense to make the bale.

Operators can rest assured with a 3-year pickup coverage on internal components including parts* and labor.

*Does not include teeth or hardware for teeth.

Let the 604R Premium do the heavy-lifting for you. The net lift system raises the netwrap roll into the tailgate from the ground or from the back of a truck.
