Product Description

604R Signature baler highlights

- Create good-looking, high-density bales
- Smart features to help you be more efficient
- Consistent, square-shouldered bales

Built with few moving parts, the camless wide pickup enhances high crop capacity while minimizing maintenance with its 71-in (180.3-cm) design that eliminates cam tracks and follower bearings.

Moisture sensors come standard on all 604R Signature balers allowing operators to view readings directly in the cab via the control system.

Atlas Pro™ control system is equipped with a 7-in (17.8-cm) color touch-screen display that gives operators advanced, real-time field statistics for up to 50 fields and allows you to view and adjust various baler settings including netwrap tension, bale density settings and monitor moisture levels all while in-cab.
