Product Description

504 Pro G4 baler highlights

- Stay in the field when it matters most
- Bale nutrient-dense silage or dry hay
- Engineered with versatility, durability and ease of use in mind

Built with few moving parts, the camless wide pickup gets the job done and helps minimize parts cost when it's time for routine maintenance. Baling tough crops? No problem. A 540 rpm or 1,000 rpm PTO tie into a split gearbox, running the pickup on one side and the chamber on the other to help spread the load to both sides of the baler. Operators can rest assured with a 3-year pickup coverage on internal components including parts* and labor. *Does not include teeth or hardware for teeth. Control the outcome of the bale from the convenience of the cab with the Atlas Pro™ control system. Monitor real-time bale and crop statistics and adjust based on moisture, crop and customer preference for up to 50 fields. Plus, control features like the knife banks, drop floor and net tension, all without ever leaving the seat. Built with few moving parts, the camless wide pickup gets the job done and helps minimize parts cost when it's time for routine maintenance.
