Product Description

MC105 highlights

- Backed by generations of hay and forage expertise
- Clean, consistent cut
- Fast dry-down for optimal nutrition

Say goodbye to a tractor that's dedicated to only mowing for the summer. Two hitch options provide a simple, one-person hookup — the drawbar swivel hitch or patented 2-point Quick Hitch — to help you get out to the field in no time. Backed by 3-year cutter bar coverage. Optimize hay quality with two different types of conditioners to select from for your operation. Steel rollers offer durability and powerful crimping action while rubber rollers focus on leaf retention of the crop. Adjust to different crops and conditions on the go. Toolless hydraulic pitch adjustment allows operators to change the angle of the blades on the cutter bar to help them achieve maximized yield while minimizing damage to the field.
