Product Description

VSR540 highlights

- Maximize the value of your high-roughage ration
- Ample processing power with virtually no spillage
- Low-maintenance, high-performing design for full-time or seasonal use

Extend machine life with a heavy-duty planetary. Less feed on the ground means less feed wasted. An optimized tub and screw design along with a bale containment kit minimize spillage during mixing or processing. Achieve a thorough and consistently mixed ration with the VSR540 single-screw vertical mixer. Built to handle high-roughage rations, this mixer can process full bales or preprocessed material in a timely and flexible manner. Empty the mixer quickly and efficiently at the end of a load with optional high-screw rpm. A 48-rpm screw, along with two points of contact with the tub floor helps clean out the tub to make sure the ration gets in the bunk or on the curb. Cleanout is quick and efficient with two points of contact on the tub floor. Less feed on the ground means less feed wasted. An optimized tub and screw design along with a bale containment kit minimize spillage during mixing or processing.
