Product Description

TM1210 highlights

- Big-time productivity, big-time convenience
- Wide cutting width, narrow transport width
- Convenient features take the stress out of operating, transporting and maintaining a large trailed mower

Maximize productivity with the Q3® cutter bar. Key features such as the Quick-Clip® blade retention system and Quick-Change™ shear ring are designed for productivity, functionality and to allow for quick and easy replacement in the field.

Want an even smoother ride? Optional 480/45 x 17 large float tires are available for the TM1210 trailed mowers.

Float over fields and contoured terrain with a nitrogen-charged accumulator suspension system that adjusts for varying field and crop conditions.
