Product Description

TM710 highlights

- Offers simplicity from the word GO
- Low horsepower requirements
- Narrow transport widths

Achieve clean cuts and high performance with the tapered, low-profile cutter bar that minimizes streaking. Each unit comes prepackaged with gears, bearings and lubricant for durability, plus 3-year coverage.

Hitch up easily. The hookup procedure is straightforward; after the hitch, PTO and hydraulics are connected it's ready to go to the field.

Help protect your mower and your field with a patented rubber torsion design. Absorb shock loads and keep the cutter bar on the ground unless it needs to float over field obstacles.

With horsepower requirements of just 55 hp (41 kW), this mower is just right for your operation.

Maneuver around obstacles with ease, thanks to the hydraulic swing cylinder.

Maneuver around obstacles with ease, thanks to the hydraulic swing cylinder.
