Product Description

TE2510 highlights

- Reduce nutritional losses in your hay by shortening dry-down time
- Convenient maintenance and durability
- Ground contouring and flotation in the field and a smooth ride on the road

The reinforced tongue offers longevity to help 10-series tedders perform year-after-year.

Get your hay off the field sooner by achieving a quicker dry down.

Help protect your machine especially in heavy, wet crops with the radial pin clutch protecting the drive components and center gearbox.
