Product Description

TE485 highlights

- Helps ensure quicker dry down, efficient operation and easy adjustments
- Impressive 48.5 ft (14.8 m) tedding width
- Get ready for long-term reliability and exceptional strength

Help shorten your dry-down time with hook tines that help improve nutrient retention, reduce the risk of weather damage and allow for quicker turnaround for subsequent cuttings. Efficient and clean operation are provided by the end curtain that can be adjusted manually or from the cab hydraulically with an optional electric selector. The curtain helps to direct crop away from fence lines and other obstacles during operation. Efficient and clean operation are provided by the end curtain that can be adjusted manually or from the cab hydraulically with an optional electric selector. The curtain helps to direct crop away from fence lines and other obstacles during operation. Operators can be confident in the robust design of the large, durable tine arms that provide exceptional strength and reliability, ensuring secure support for hook tines.
